I. Product Introduction

This user guide is only suitable for 2D barcode scanner. The purpose is to know all knowledge with barcode identification equipment for customers. This manual is mainly for the software engineers and some customers who want to know the device in further.

This manual lists the main function of the scanner, including: barcode reading, supported barcode type, data edition, command setting and advance setting.

II Quick to use

2.1 Install method

For USB device, it is plug and play, no need extra power supply to identify HID device. That's convenient appropriate for Windows, Linux, Android and other system. Also, support Virtual COM port, just need an extra drive supply, which can be supported by this company or dealers to offer. The physical serial port conforms to standard RS-232 interfaces, which can directly communicate with standard RS232 device. Note, in case of serial port, additional Power DC 5V is generally required. For details, please refer to the serial port function section. Some of models support for KB interface. Need to power off the device and plug in the device with common keyboard, then power on again and start to communicate.

2.2 Quick to use

After connecting in a short time on device, the scanner will be on by itself, include interface, power on indicate, volume indicate, configuration, parameters setting. Normally, directly pressing the button can activate decoding. In additional, some models also support automation induction trigger, serial command trigger.

2.3 Settings method

There are two methods for set up.

One method is without parameter set up which scan one barcode is ok.
Example: "enable successful reading voice prompt", or "enable Code 39".

The other method needs to set up parameter.

Example: set "98" as suffix.

Setting steps: "custom suffix", "3", "9", "3", "8", "Save".

III Function settings

Default

Enable All Codes

Disable All Codes

Enable All 1D Codes

Disable All 1D Codes

Enable All 2D Codes

Disable All 2D Codes

Version Information

3.1 Interface selection

Low

Medium

High

Keyboard function

The scanner is essentially an input device and can be understood as a keyboard device. Different countries use different keyboard layouts, and corresponding keyboard function.

3.4 Language settings

USA

Japan

Brazil

Czech

Denmark

Sweden

France

Italy

Norway

Spain

Slovakia

Turkey

UK

Germany

Greece

Hungary

3.5 Caps lock Function

This function can lock “Caps lock” function key, and keep the letter format without change.

Off

On

3.5.1 Number lock Function

This function can move the numeric keypad in the letter area to the keypad area and enter the numeric keypad with keypad.

Off

On

3.5.2 Character prompt

For non-visual characters, you can set the prompt tone, indicating that there are non-printable characters in the data.

Enable

Disable

3.5.3 Character delay

For some systems with slower processing speed, can set character delay.

Not Delay

Short Delay (20ms)

Long Delay (40ms)

3.5.4 Alt Emulate keyboard

This feature can simulate the ASCII mode of sending keyboard data, without the keyboard layout affection.

ALT Mode OFF

ALT Mode ON

3.5.5 Shift Function

Shift Lock Off

Shift Lock On

3.6 Serial Port function

The serial port supports the standard RS-232 interface and TTL-232 standard. The virtual serial port function is not affected by this section.

3.6.1 Baud rate

1200 bps

2400 bps

4800 bps

9600 bps

19200 bps

38400 bps

57600 bps

115200 bps

3.6.2 Parity

None

Even

Odd

3.6.3 Stop bits

1 Bit

2 Bit

3.6.4 Data bits

7 Bit

8 Bit

3.6.5 Control flow

Off

On

3.7 Data Edit

3.7.1 Prefix and Suffix settings

Prefix and suffix are the basic data edit function, including terminal characters setting are also included in this section,

Example: set "a" as prefix.

Step: "Enable custom prefix", "set custom prefix", "9", "7", "Save".

Disable Custom Prefix

Enable Custom Prefix

Set Custom Prefix

Disable Custom Suffix

Enable Custom Suffix

Set Custom Suffix

Terminating Character 0x0D

Terminating Character 0x0D 0x0A

3.7.2 Convert Case
