## Introduction

This user manual is designed for omnidirectional laser barcode scanner. For detailed usage manual information, please download the complete user manual from our website or obtain it from our distributor.

## Copyright

All right reserved by our company, reprint, copy or sales of this manual are forbidden without our company permission.

## Responsibility Clause

We are not responsibility for errors, omissions and variation without notice.

## Change the Scanner Setting

In order to change the scanner setting, please follow the steps below:

1. Scan the Enter/Exit Programming Mode barcode. There will be 2 beeps (low-high) indicating ready to make settings.
2. Scan barcodes for the desired feature (1 beep)
3. Scan the Enter/Exit Programming Mode barcode again to save the configuration. There will be 2 beeps (long---short) indicating a successful setting.

After reading a valid barcode in programming mode, the scanner will give a high beep.

## System Setting

## Reset

Reading of "Reset" barcode turns all parameters back to default values, and the scanner remains in the last interface set when it is reset.

$\star=$ Default Value

## Return to PC/AT \& USB Default

Return to PC/AT \& USB default

## Return to Automatic Interface

## Return to RS-232 Default

## Sleep Timeouts Selection

In this section, user can set both laser and/or motor to enter into sleep mode. The timeout programming barcodes will allow users to set the different time frame before entering into laser and/or motor sleep mode. The feature reduces power consumption and prolongs scanner life time.

## Motor Sleep Timeouts Selection

Motor sleep mode off

Motor sleep time 10 min

#  <br> $\star$ Motor sleep time 30 min 

## Laser Sleep Timeouts Selection

Laser sleep time 30 min

## Scan Code Delay Time

This parameter sets the minimum time allowed between decodes of the same barcode.

$\star$ Same code delay time 600 mses.

#  <br> Same code delay time 900 mses. 

#  <br> $\star$ Allow to continuous reading of the same barcode 

## Beeper Setting

##  <br> Power-up tone disable

## Beeper Tone

High beeper tone

Low beeper tone

## Speaker disable

Beeper Sound Duration

Short duration

#  <br> $\star$ Medium duration 

Long duration

## Data Edit

## Prefix and Suffix

Prefix / suffix Maximum character length is 10 characters, setting steps:

1. Scan the "Enter/Exit programming mode" barcode
2. Scan the "prefix" / "suffix" bar code, need to add the prefix and suffix, please set separately
3. Scan the barcode from the FULL ASCLL list (please refer to the full user manual)
4. Scan the "prefix" / "suffix" barcode
5. Scan the "Enter/Exit programming mode" barcode

Prefix

## Suffix

## Terminator

None

28

## TAB (OXOD+OXOA)

$\star$ Enter (0xod)

29

Space (0×20)

Return ( $0 \times 0 \mathrm{~A}$ )

## Truncate Header/Trailer Character

Intercept start and stop character setting steps: 1. Scan the "Enter/Exit programming mode" barcode.
2. Scan the "Data intercept start digit" barcode.
3. Read the 3 -digit 0 to 9 in the setting parameter table continuously.
4. Scan the "Data intercept stop digit" barcode.
5. Read the 3 -digit 0 to 9 in the setting parameter table continuously.
6. Scan the"Intercept from left to right"/ "Intercept from right to left" barcode.
7.Scan the "Enter/Exit programming mode" barcode.

Intercept from right to left

#  <br> Data intercept start digit 

33

For example, if the barcode is" 0123456 ",take " 234 ",that means the first 3 to 5 digits.
Setting steps:
scan"Enter/Exit Progamming Mode"
"Data intercept start digit"
"0","0", "3"
"Data intercept stop digit"
"0","0","5"
"Intercept from left to right"
"Enter/Exit Programming Mode".

## Add Code Length

Add Code Length as Header Enable
(All barcode)
